Hey Gary. I don't know the answers to these off the top of my head, but can research them and get back to you. How soon do you need an answer? I should be able to work on it today, but I also have a company coming in for a meeting tomorrow or Wed. that I need to prepare for.

Melissa

▼ Gary Moore---08/15/2011 08:05:34 AM---Melissa: I need to see if you can answer the following questions:

From: Gary Moore/R6/USEPA/US
To: Melissa Smith/R6/USEPA/US@EPA
Date: 08/15/2011 08:05 AM
Subject: Falcon Refinery

Melissa:

I need to see if you can answer the following questions:

1. K169 is listed for what contaminants? I think benzene only but not sure.
2. Can you treat away the K169 listing? I don't think you can but can you. Its my understanding that you can only treat away a characteristic listing.
3. When would the waste have to have been deposited to carry the K169 code? I assume, its the date of the listing, which I don't know,
4. If it was prior to the date to the development date of the K169 codes, do we revert to characteristic listings? I think you can treat a characteristic waste and it not be hazardous.

Thanks

Gary Moore
